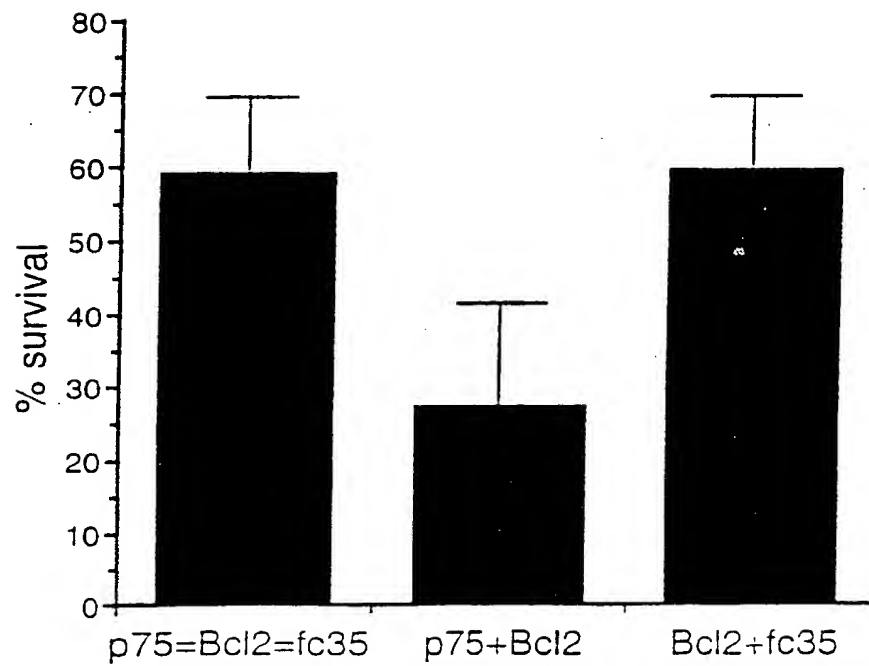

Figure 5

# Soluble c35 can inhibit p75NTR-mediated death

Docket No.:  
Title:  
Inventor:

3206.1001-000  
Method of Modulating Cell Survival and  
Reagents Useful for Same  
Perry Francis Bartlett *et al.*

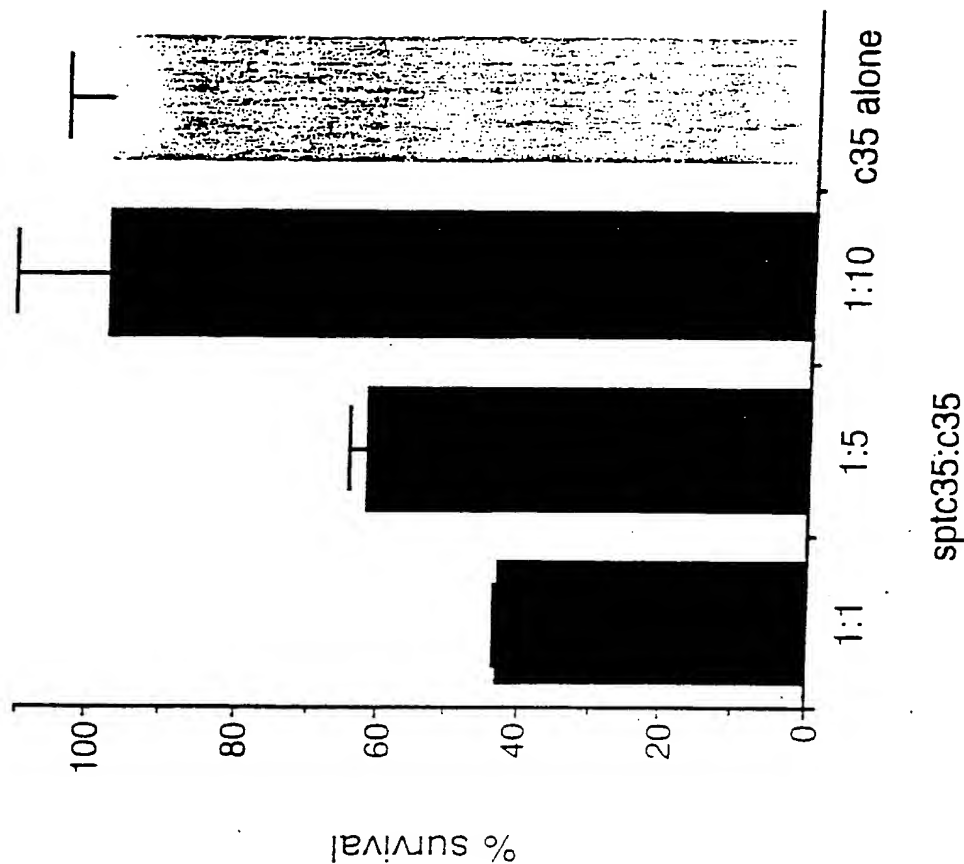

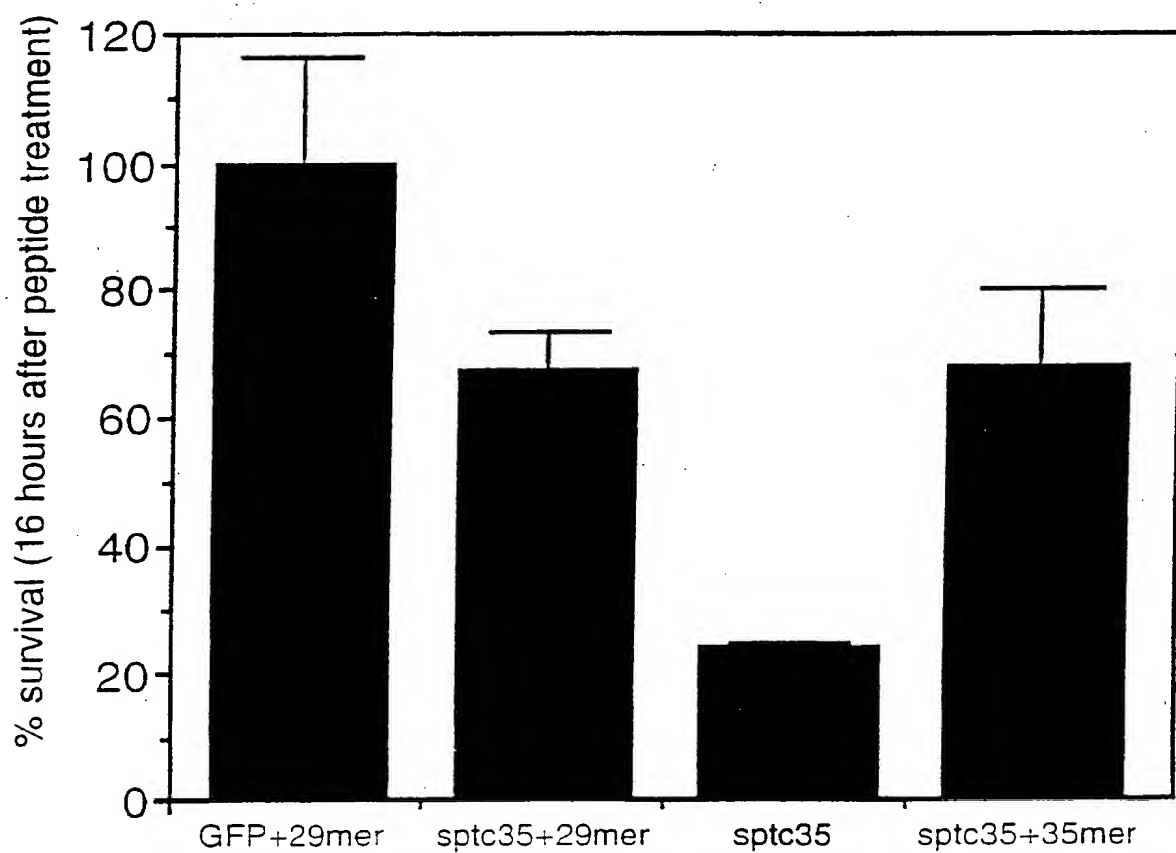

Figure 6

### Protection of membrane-bound killing domain by soluble peptide

treatment: microinjection of sptc35/GFP followed by 30' peptide treatment.  
all conditions contain penetratin

Figure 7

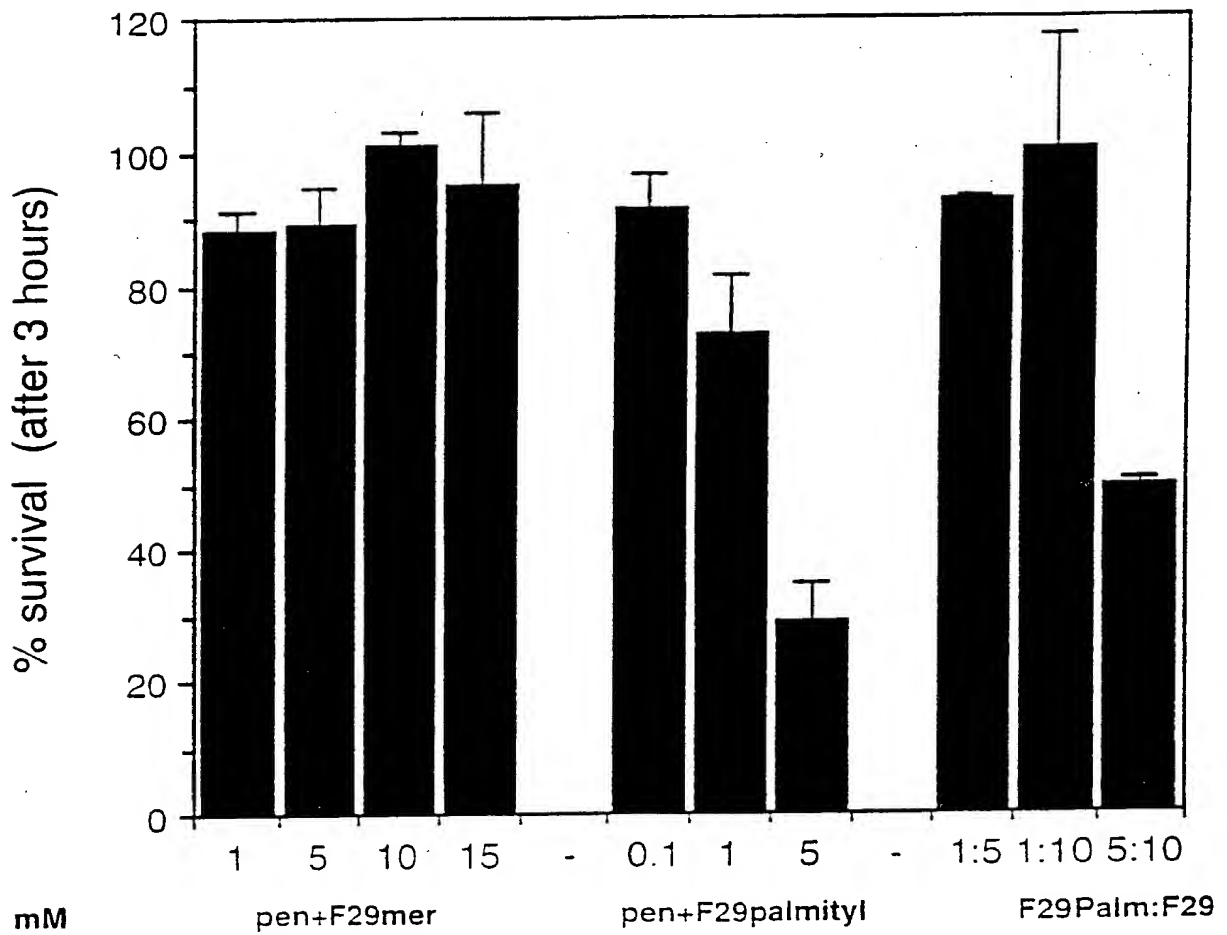

Figure 8

### Peptide treatment. Survival over 5 hours
